

AREAS OF USE

Glazed steel profile partitions can be used in internal areas.

CERTIFICATE OF CONFORMITY

B0 and B15 class fire partition meets IMO and SOLAS requirements according to European MED Directive 2014/90/EU.

PROPERTIES

Resistance to fire: B0 or B15

Steel profile partitions have rigid welded construction with large glass area. Partition is designed from steel tube profiles either hollow or with calcium silicate insulation with depth of 50mm.

DIMENSIONS

Maximum size of glazing: 2146 x 2416 mm (width x height)
Glazed partition can be continued to achieve required length.

Weight: 39kg/m² (depending on the glass used)

FINISHING

Standard finish is powder paint.

In addition wet paint, stainless steel (brushed or polished), or other non-combustible design finishes can be used.

Glass can be equipped with clear, silkprinted or with Mirastar surface treatment.
