

# Lightweight Metal Door SMU112

## AREAS OF USE

The lightweight sheet metal door is intended for indoor use (such as basements, storage rooms, and other interior spaces) where no requirements for fire resistance, sound insulation, or security are specified.

## MEASUREMENTS AND PROPERTIES

Door frame depth: 82 mm  
Door leaf thickness: 45 mm  
Door set weight: 19 kg/m<sup>2</sup>

Material: Electro-galvanized steel sheet (Zn), 1.0 mm

The lightweight door is manufactured as a single-leaf door. The door is equipped with two zinc-plated or stainless steel metal door hinges. In the standard solution, the hinges are not painted.

Doors are available in the following modular sizes: 8×21, 9×21, 10×21.

For alternative dimensions, please contact our sales department.

## FINISHING

Standard finish: RAL Classic colours, smooth matte powder coating or paint (35% gloss level).

## EXTRAS

For the door locking system, the available options are ASSA 565 or EURO 1769 (either factory-installed locking or lock preparation).

In addition to the strike plate, it is possible to order a lock cylinder, handle set, and door closer, either supplied separately in the package or installed
