

SMU FRAMUUGI PAIGALDUSJUHEND ET SMU SIDELIGHT AND TOPLIGHT INSTALLATION INSTRUCTION EN

Paigaldusjuhend/ Installation guide

Külje- ja ülaosa tarnitakse eraldi detailidena. Klaasid tarnitakse eraldi pakendis. Käesolev juhend toetub SMU paigaldusjuhendit ning käsitleb framuugi kokkupanekut ja paigaldust. Konstruktsiooni paigaldamine ehitusavasse toimub vastavalt SMU paigaldusjuhendile.

The side and top sections are supplied as separate components. The glazing is supplied in a separate package. This manual is based on the SMU Installation Manual and covers the assembly and installation of the sidelight and toplight. Installation of the assembly into the wall opening shall be carried out in accordance with the SMU Installation Manual.

- 1 Eralda ukseleht/lehed ukseleht, tõstes need hingedelt maha.
Remove the door leaf/leaves from the frame by lifting them off the hinges.

- 2 Eemalda klaasiliistud. Jälgi, et klaasiliistud paigaldataks tagasi samasse kohta, kus need olid konstruktsioonil enne klaaside paigaldamist.
Remove the glazing beads. Reinstall them in the same position as before the glass installation.

- 2.1 2.2 Eemalda profiililt klaasiliistu kinnituskruvid, et klaasi paigaldada avasse.
Remove the glazing bead fixing screws from the profile to install the glass in the opening.

- 3 Paigalda külje- ja ülaosa profiilide ning ukselehti vahele tihendid.
Install the seals between the side and top sections and the door frame.

*Kohaldub ainult tuletõkkeustele
*For fire-rated doors only

- Kinnita üla- ja küljeosad ukseleki külge 6,3 × 32 mm isepuurivate kruvidega, kasutades olemasolevaid eelpuuritud avasid. Kruvide suund on lengi poolt framuugi.
Secure the top and side sections to the door frame using 6.3 × 32 mm self-drilling screws through the pre-drilled holes in the components. The screws shall be installed from the door frame towards the side- and/or toplight.

2 → 14

- Paigalda konstruktsioon ehitusavasse vastavalt SMU paigaldusjuhendile. SMU paigaldusjuhend on saadaval Tammeri kodulehel. Install the assembly into the wall opening in accordance with the SMU Installation Manual. The SMU Installation Manual is available on the Tammer website.

4

5

- Kui tihendid pole eelpaigaldatud, paigalda tihend klaasiliistule ja profiili kõrvale (tuletõkketooted: Kerafix 2000).
If the seals are not pre-installed, install the seal on the glazing bead and next to the profile (for fire-rated products: Kerafix 2000).

- Kinnita alumine küljeosa vähemalt 7,5 × 72 mm peitpeaga betoonkruvidega. Secure the lower side section using countersunk concrete screws, minimum 7.5 × 72 mm.

60-100 mm

- Paigalda kande- ja distantsklotsid, mis paiknevad 60–100 mm kaugusel klaasi nurkadest. Enne klotside paigaldamist eemalda nende alt tihend. Kasuta ainult tootega tarnitud klotse ja kiile. Install the setting and spacer blocks positioned 60–100 mm from the glass corners. Remove the seal beneath the blocks before installation. Use only setting blocks and wedges supplied for the product.

6

7

- Toeta klaasi alumine serv kandeklotsidele. Support the bottom edge of the glass on support blocks.

8

- Klaasi paigalduse järel paigalda klaasiliistukruvid. After installing the glass, install the glazing bead screws. **Alt 2.**

9

Alt 1.

Alt 2.

- Paigalda klaasiliistud tagasi eemaldamisele vastupidises järjekorras, järgides kinnitusviisi.
Refit the glazing beads in the reverse sequence of removal, observing the original method of fastening.

Stalprofiili standardühendus (Alt 2.) / Stalprofil standard connection (Alt 2.):

- Alusta horisontaalsetest liistudest (profiilist profiilini), seejärel paigalda vertikaalsed liistud.
- Kinnita liist, lüües kummihaamri või puitklotsiga liistu välimist nurka.
- Alusta ühest otsast ja liigu järjest teise otsani.
- Veendu, et liist kinnitub kruvidele ja vahe puudub.
- Vajadusel koputa õrnalt kruvi telje suunas, et kinnitus fikseeruks.
- Kontrolli kinnitust ja ühtlasi vahesid.

- Start with the horizontal glazing beads (profile to profile), then install the vertical beads.
- Secure the glazing bead by striking its outer edge with a rubber mallet or a wooden block.
- Start at one end and work step-by-step to the other end.
- Make sure the bead clips onto the screws and there is no gap.
- If necessary, tap gently toward the screw axis to lock the fixing in place.
- Check proper fixing and even gaps.

10

- Kontrolli loodiga, et konstruktsioon oleks kõikidest külgedest paralleelne ja vajadusel reguleeri.
Check the alignment of the assembly on all sides using a spirit level and adjust if necessary.

11

- Täida lengi ja seina vaheline vahe vastavalt tabelile 1. Suitsutõkke puhul tihenda villa pind ühelt poolt hermeetikuga. Tabel 1 on leitav SMU paigaldusjuhendist.
Fill the gap between the frame and wall according to the table 1. For smoke-control products, seal the insulation surface on one side with sealant. Table 1 can be found in the SMU Installation Manual.

12

- ⚙️ Kontrolli riivide/suluste toimivust. Vajadusel reguleeri.
Check latch/lock operation and adjust if needed.

13

- ⚙️ Paigalda plastikpeitekorgid lengi kinnitusavadele ning kinnita vajadusel piirdeliistud (max 500 mm sammuga).
Install the plastic cover caps in the frame fixing holes and, if required, secure the cover trims (maximum spacing 500 mm).

14

Kerafix 2000

Pyroplex*

Silikoon/ Silicone sealant

- ⚙️ Välisootel silikoonida klaasi ja klaasiliistu, ukselengi ja framuugi vaheline pilu ning ukse ja põranda pilu.
For exterior products, apply silicone to the gaps between the glass and glazing bead, the door frame and threshold, and the door and floor.
